We are not liable for the use of iphones, iPods, or MP3's stopping if you do not have enough battery power on your device. Your device should be placed in airplane mode to prevent interruption from texts, phone calls, or notifications. In the event your music should stop, your squad must continue to perform without the music. After your teams completed performance we will decide if the reasons were because of the events machinery or your device and if your team can perform again being judged from where the music cut out.
